Any changes to the race car throughout the season, it is the Driver's responsibility to inform the Eligibility Scrutineer and CSCC office in writing.

Any variance from the engine and gearbox specification and minimum weight used in the Regulations will cause the car to be technically ineligible and penalties will be applied accordingly.

5.2.2. Minimum Weight, Success Ballast & Engine Specification:

If the weight of a car does not conform with the set minimum weight for its class, the car is in breach of the Regulations, this will be duly reported to the Championship Eligibility Scrutineer & Clerk of the Course.

If there is reason to doubt the correctness of placement in a particular class based on the results achieved and the lap times in particular, the Eligibility Scrutineer & the Organisers Technical Advisors can:

Move a competitor to another class, at any time in the season and during a competition. Whilst weather, track conditions and the level of competition will be taken into account, if the performance, lap time or specification of a car is deemed by the Organisers to be incorrect for the class, the competitor will be instructed to move to a different class, during or following an event. The Organisers' decision is final and not subject to protest, notwithstanding a competitors' right to appeal.

Check the engine and gearbox specification and minimum weight of any car after the end of qualifying session or race. The engine may be checked for compliance with regulations by means of cylinder compression testing and visual inspection of engine internals using a borescope or removing the rocker cover to inspect camshafts. The Driver must co-operate with the inspection without any reservation. Competitors should be aware that it is their entire responsibility to ensure that the vehicle complies with the relevant engine specification and minimum weight at all times.

Turbo charged engine cars: Check turbo boost pressure, using a club supplied boost gauge and camera. These can be fitted to any car at any time during the race event. If the boost recorded on this gauge exceeds the maximum allowable peak boost pressure detailed in 5.2.1, then the Competitor will be excluded from that particular round, with a loss of award and points. The CSCC reserve the right to move a Competitor to a more appropriate class, until such time as the boost pressure is demonstrated to be below the maximum allowable amount. It is the Competitor's responsibility to ensure the boost gauge can be fitted during a race event.

If the engine specification and minimum weight does not tally with the details set for its class, the car is in breach of the Regulations, this will be duly reported to the Championship Eligibility Scrutineer & Clerk of the Course.

Class R53 and R56 cars only: The winning car from classes R53 and R56 will each gain an extra 20kg of success ballast, to be carried at both championship races of the next CSCC race event they enter.

R53 and R56 Success Ballast:

- a) The overall class winning cars in each race, from classes R53 and R56 only, will be required to add 20 kg of success ballast at the next race event that the car competes in. As an example, if two different cars win each race, at the first race event, then both these cars will carry a weight penalty at their next race event entered.
- b) The success ballast handicap will be added to the cars required minimum base weight and not to the weight that car was recorded at post-race.
- c) If the same driver/s or car win again whilst they are still carrying success ballast, the weight increases by a further 20kg, until such time as they start a race but do not win a round during a race event. If the same driver/s or car fails to win their class in both rounds of a next race event whilst carrying success ballast, all success ballast will be removed for the next round i.e. they will carry no weight penalty at the next race weekend.
- d) The maximum success ballast allocated shall not exceed 60kg.
- e) Any vehicle which fails to carry the success ballast specified by the Technical Committee will automatically be deemed not to comply with the Technical Regulations.

Any variance from the minimum weight figures used in the Regulations will cause the car to be technically ineligible and penalties will be applied accordingly.

5.2.3. SCALES:

To establish the minimum car weight, nominated 'Scales of the day' will be selected by the Eligibility Scrutineer.

The nominated 'Scales of the day' will either be the circuit's own weighbridge which will be considered to be 100% accurate or the Championship scales, which will have a tolerance of +/- 5kg.

5.2.4. ENFORCEMENT OF REGULATIONS:

The Championship Eligibility Scrutineer, liaising with the Organisers Technical Advisor, will apply the Regulations in every material respect and non-compliance for any reason will lead to either exclusion on points or disqualification from the qualifying / race and put at the back of the grid. The non-compliant penalty will be agreed by the Championship Eligibility Scrutineer, Clerk of the course and the Organisers Technical Advisor. Please note anything else outside our Regulations, without prior notice to the Eligibility Scrutineer will be treated accordingly.

A car found to be ineligible for the Championship must race only in the invitation class and no points scored until the vehicle conforms to the Regulations.
